「G3A3」

G3二挺揃い踏み。
ノーマルG3とワイドハンドガード・タイプ。
じーすり先輩はワイドタイプの方ですね。

でも私達古いてっぽう好きからすると、G3と言えばこのノーマルタイプの方を思い浮かべる筈（笑）
とにかくスリムでカッコイイ!! この美しい姿にヤラレた人が多かった。
しかしモデルガンとして商品化される事は無く、初めて立体物として手にしたのは、電動ガンでした。
そのファーストインプレッションは…「デカイ! なんか間延びしてる! ハンドガード遠い!」
100年の恋が一気にしぼんだ瞬間でした（笑）

本物を手にした今、「デカイ」という感想は相変わらずなんですが、間延びはしてないです。
トイガン化する時の微妙なデフォルメやアレンジでそう感じたみたい。

…で、まあ一度しぼんだ恋心が再燃したのはワイドハンドガード&バイポッド付きのG3を見てから。
「カッ…カッコエエ…!!」
やっぱりG3はカッコ良かった!!
遠いハンドガードもワイドになって手前に延長されたし、その後いろんな画像や動画を見てると、みんなハンドガードとレシーバーの境の辺りを握ってる。
なんだ、やっぱりみんなハンドガード遠いって思ってんじゃん。

そんなG3も好きが高じて二挺所持。

本物を手にしてひとつ感想が増えました。

「…ぐぞ重てぇ…!!」

In a world of compromises, some people put watermarks on their pages.

But it doesn't matter, because our translations are the fastest ones out there. Look at how cool our translator is... if you send us money you will be that cool of an operator too. And chicks will dig you.

At /ak/, we stuck some translated text on a manga page, just like a bunch of other scanlating groups have done. However ours is better, because we refuse to post it to any other sites than [redacted] http://ak-scans.wikia.com and [redacted] /a. Because:

Our wiki is the greatest wiki ever made. It may be unorganized and have limited content, but that's your fault. If you were a real operator you would love it. once again look at our translator, that sig sure is cool isn't it?

Yeah, you know you want to send money to us.

And by the way, check out our new website. We decided that humans don't need to quickly read manga by webpages. If you were a really manly teutonic operator, you wouldn't be bother by downloads, plus we've tested the server to be able to take 100,000,000 requests at one time, and that was when the server was buried in a lake of molten lava, on the moon. If you don't believe us, it is because you aren't a real operator.

By the way, our cheap, mass-scanned manga are the best thing ever, and totally worth giving us lots of money, but not that cheap, mass-scanned, manga from other people, thats garbage. not that it matters because you're not in our threads, so you will have to wait for your translations. Because you suck, and we hate you, but we know you'll be back. We can beat you down like a trailer park wife, but you'll come back, you always do.

Give us money.

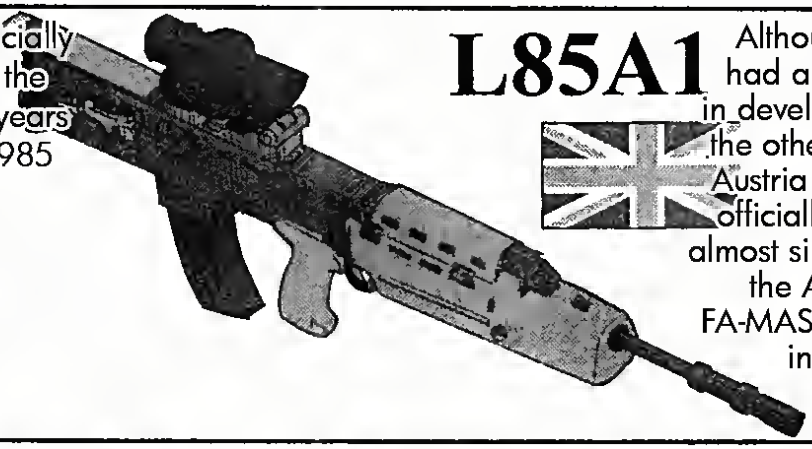
The bullpup rifles AUG, FA-MAS and L85

As the M16 began ta thrive in the later half af the 1960s, variaus natians campeted in the develapment af intermediate calibre assault rifles.

This gave birth ta three campact assault rifles that diverged fram the canventianal layaut.

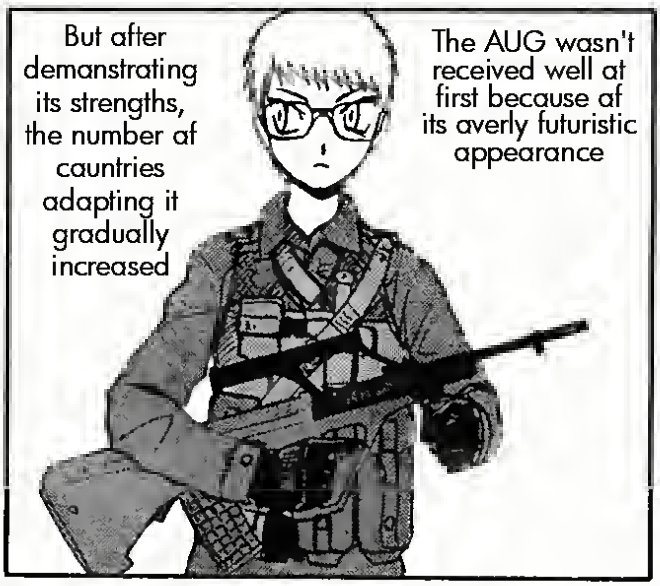
Britain officially adopted the L85 eight years later in 1985



L85A1

Although Britain had a head start in development over the other countries, Austria and France officially adopted, almost simultaneously, the AUG and FA-MAS respectively in 1977

The main reasan were the flaws in in the magazine
25 round magazine
On the ather hand, the FA-MAS failed to achieve a commercial success like that af the AUG
This part is easy ta damage



But after demanstrating its strengths, the number af cauntries adapting it gradually increased
The AUG wasn't received well at first because af its averly futuristic appearance

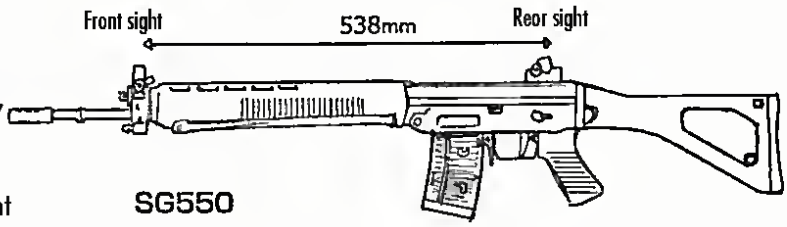
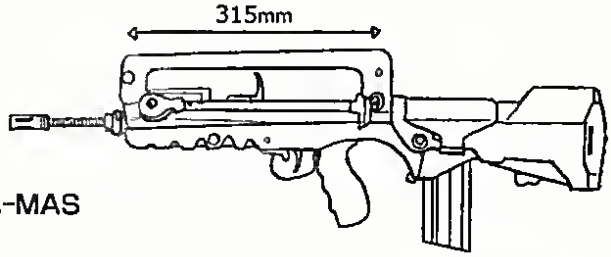
This alsa leads ta a decreased **sight radius**, the distance between the rear and frant sight.

The result is detrimental ta the accuracy af the sights.



SG550

The greatest advantage af a bullpup rifle is the fact that the layaut af its mechanism allaws ta sharten the averall length, but...



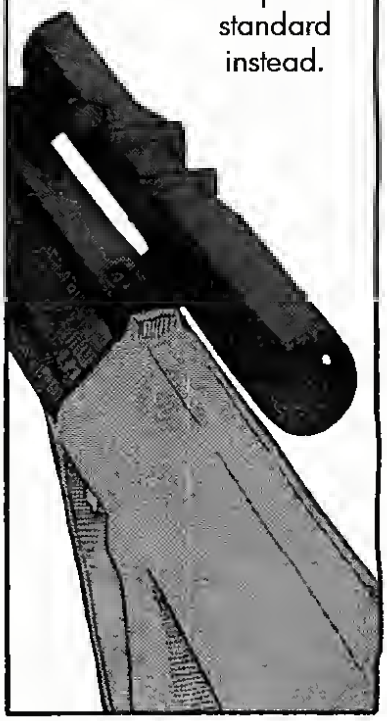
FA-MAS

Regarding the French army, they didn't want ta attach a fragile part like a scape ta a rifle handled by camman saldiers.

The FA-MAS an the ather hand uses a bipad ta imprave shaating accuracy.

A scope with a low mognificotion of 1.5x is enough, since it's not intended for sniping

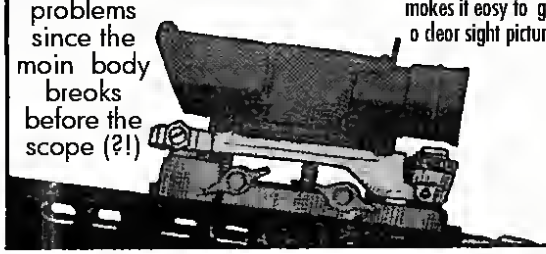
The AUG and athers simply gave up an this, issuing a scope as standard instead.



But there ore no problems since the moin body breoks before the scope (?!)

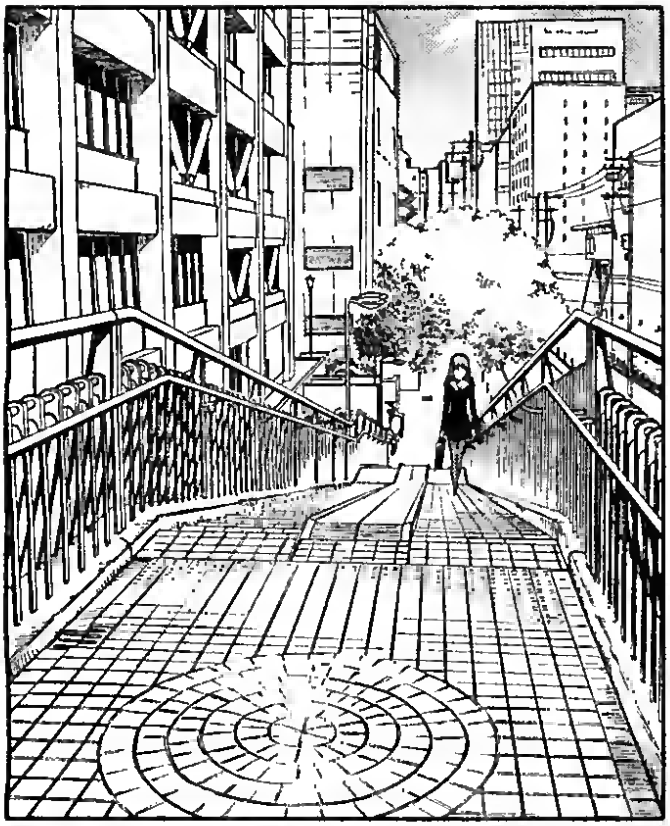
4x

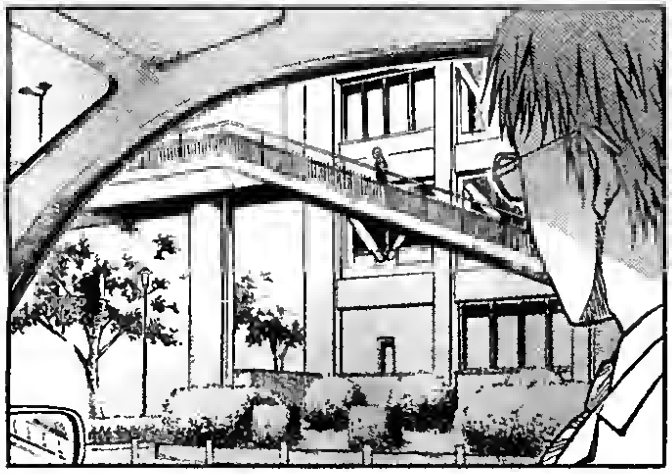
The foirly good opticol performonce mokes it eosy to get o deor sight picture

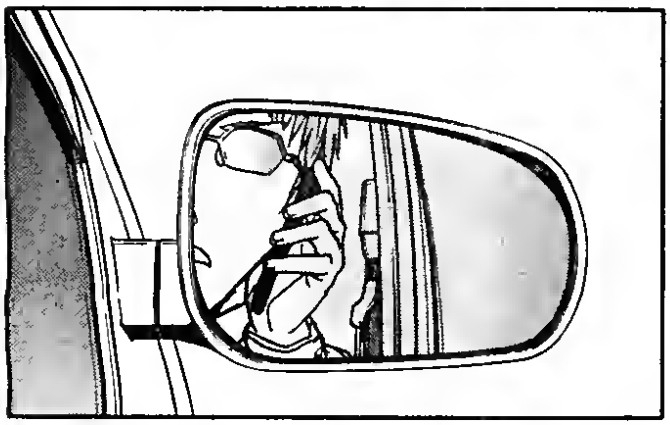


By the way, the L85 has a 4x aptic, the SUSAT* scape, equipped as standard.

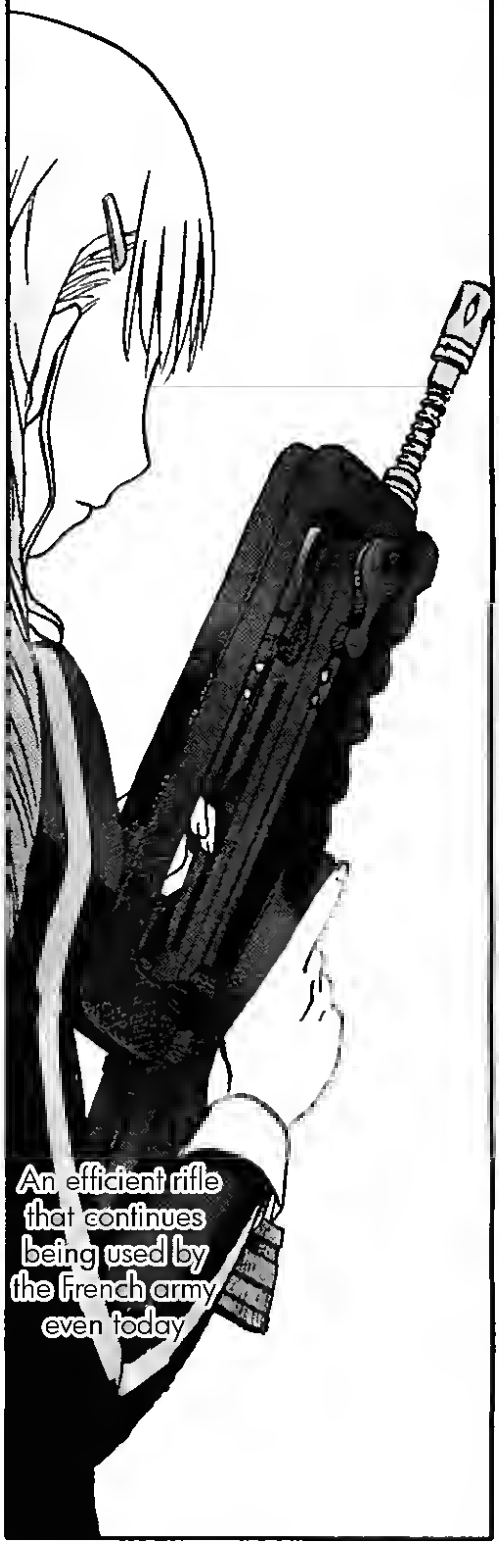
*Sight Unit Small Arms, Trilux







Even though the FA-MAS was a commercial failure, it was the first **bullpup** rifle adopted by an army.



An efficient rifle that continues being used by the French army even today

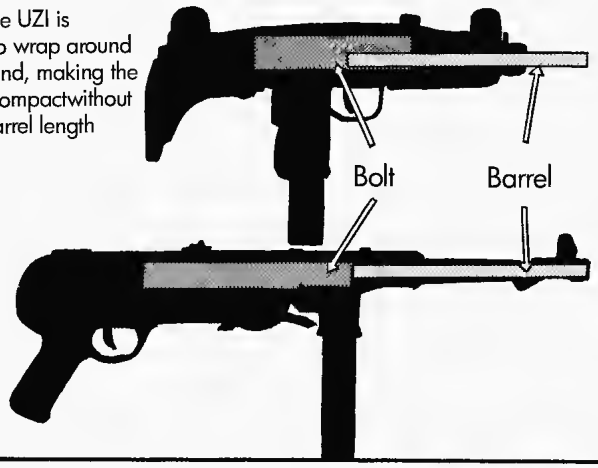
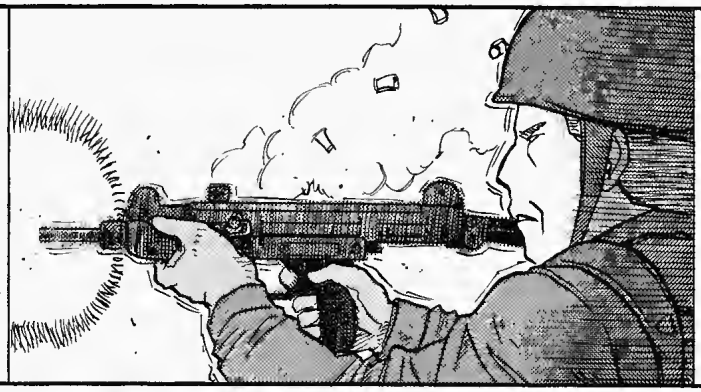
Due to its tough and reliable design and high producibility, it became the world standard of SMGs in this era

The bolt of the UZI is constructed to wrap around the barrel's end, making the total length compactwithout sacrificing barrel length



By adopting the characteristic L shaped bolt, the UZI succeed in making the whole design compact

It was officially adopted by the country and fought to the bitter end during the 2nd and 3rd Arab-Israeli wars. But it also appeared in great numbers in other countries, starting with west Germany, Belgium, Holland, Rhodesia, south Africa, etc.



It replaced the FN-FAL, which had problems with the sand occurring in Israel, as weapon for front-line soldiers

A strong rival emerged from west Germany

But 10 years after UZI's adoption

In a world of compromises, some people put watermarks on their pages

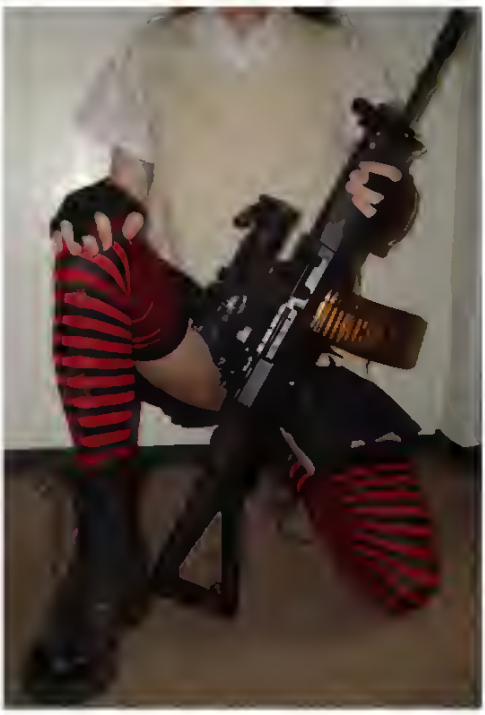
But it doesn't matter, because our translations are the fastest ones out there Look at how cool our translator is if you send us money you will be that cool of an operator too And chicks will dig you

At /ak/, we stuck some translated text on a manga page, just like a bunch of other scanlating groups have done However ours is better, because we refuse to post it to any other sites than http://ak-scans.wikia.com and /a Because

Our wiki is the greatest wiki ever made It may be unorganized and have limited content, but that's your fault If you were a real operator you would love it once again look at our translator, that sig sure is cool isn't it?



Yeah, you know you want to send money to us

And by the way, check out our new website We decided that humans don't need to quickly read manga by webpages If you were a really manly teutonic operator, you wouldn't be bother by downloads plus we've tested the server to be able to take 100,000,000 requests at one time, and that was when the server was buried in a lake of molten lava, on the moon If you don't believe us, it is because you aren't a real operator

By the way, our cheap , mass-scanned manga are the best thing ever, and totally worth giving us lots of money, but not that cheap , mass-scanned, manga from other people, thats garbage not that it matters because you're not in our threads, so you will have to wait for your translations Because you suck, and we hate you, but we know you'll be back We can beat you down like a trailer park wife, but you'll come back, you always do

Give us money.

Sincerely,

"G3"

Here's G3 nee-sama for her adventure in the manga series.

I removed the bipod and fitted her with a 10 round mag.
The scope is made by Titan.
Mount is by MGC (MGC is a Japanese toy gun manufacturer, it actually fits the real rifle).
The MGC mount can be adjusted for sniping over 1Km, amazing!

But there's something off...

Those of you who noticed are quite a G3 Otaku.

I actually swapped out the rear sight with one made for the HK21 GPMG. Since they're designed on the same format, it's actualy quite easy to interchage them. (By the way, G3's bipod is now on HK33)

It adds a nice heavy feeling, it's a pretty cool modification.

G3 in the manga series has not been converted into this setup, but soon will be.
